Lipids: the continuing challenge

Proceedings of a symposium
held at the Faculty of Health Science,
Limburg University,
Maastricht, The Netherlands

February 13–14, 1992

Guest Scientific Editors
Gerard Hornstra
Wim HM Saris

Secretarial Assistance
Marco Berndes

Sponsors
Dairy Foundation on Nutrition and Health, Maarssen, The Netherlands
Faculty of Health Science, Limburg University, Maastricht, The Netherlands
Sandoz-Nutrition Ltd, Bern, Switzerland
Netherlands Heart Foundation, The Hague
Sugar Foundation of The Netherlands, Amsterdam
Boehringer Ingelheim BV, Alkmaar, The Netherlands
Lipids: the continuing challenge

ix  Preface.  G Hornstra and WHM Saris

New findings and visions

703S  The role of essential fatty acids in neural development: implications for perinatal nutrition.  MA Crawford

711S  Effects of the individual saturated fatty acids on serum lipids and lipoprotein concentrations.  RP Mensink

715S  Lipid peroxidation: its mechanism, measurement, and significance.  B Halliwell and S Chirico

732S  Fatty acid metabolism in health and disease: the role of Δ-6-desaturase.  DF Horrobin

Fuel, flame, and fire: relationships between lipid and carbohydrate metabolism

738S  The regulatory, informational, and immunomodulatory roles of fat fuels.  EA Newsholme, P Calder, and P Yaqoob

752S  Free fatty acids and exercise.  B Saltin and P-O Åstrand

759S  Food quotient, respiratory quotient, and energy balance.  KR Westerterp

766S  Energy balance or fat balance?  B Swinburn and E Ravussin

772S  Dietary fat and the control of energy intake: evaluating the effects of fat on meal size and postmeal satiety.  JE Blundell, VJ Burley, JR Cotton, and CL Lawton

Minor components of major importance

779S  Cytotoxicity and genotoxicity of lipid-oxidation products.  H Esterbauer

787S  Increased risk of cardiovascular disease at suboptimal plasma concentrations of essential antioxidants: an epidemiological update with special attention to carotene and vitamin C.  KF Gey, UK Moser, P Jordan, HB Stähelin, M Elchholzer, and E Lüdlin

798S  Messengers and mediators: interactions among lipids, eicosanoids, and cytokines.  S Endres

801S  Omega-3 fatty acids: essential fatty acids with important biological effects, and serum phospholipid fatty acids as markers of dietary ω-3 fatty acid intake.  KS Bjerve, AM Brubakk, KJ Fougner, H Johnsen, K Midthjell, and T Vik
807S Effects of supplementation with ω-3 long-chain polyunsaturated fatty acids on retinal and cortical development in premature infants. DR Hoffman, EE Birch, DG Birch, and RD Uauy

Posters

813S Long-term aspects of phospholipidic analysis of fatty acid methyl esters by use of nonpolar capillary gas chromatography. AEP de Jong, TS van den Berg, A Nijmeijer-Couprie, JP Goedhart, and E Oosting

814S Fetal essential fatty acid (EFA) status during early human development: relationship with maternal EFA status. AC van Houwelingen, J Puls, and G Hornstra

815S Fetal essential fatty acids during gestation. AC van Houwelingen, MMHP Foreman-van Drongelen, MDM Al, G Hornstra, and U Nicollini

816S Circadian variation of apolipoproteins C-II and C-III and cholesteryl ester metabolism in relation to lipemia in healthy volunteers. JF Lontie, T Magot, and CL Malmendier

818S Lipid peroxidation of phospholipid liposomes is influenced by their fatty acid composition. RCM Vossen, MCE van dam-Mieras, G Hornstra, and RFA Zwaal

819S Metabolism of parenterally administered fat emulsions in rats: studies with [1,13C]- and [8,13C]-labeled triolein. W Bäurle, H Brösicke, P Fürst, and DE Matthews

820S Dietary fructooligosaccharides modify lipid metabolism in rats. NM Delzenne, N Kok, M-F Flordaliso, DM Deboyser, FM Goethals, and MB Robertfoid

821S The influence of parenteral n−3 fatty acids on nitrogen and lipid metabolism in rats. S Nau, I Hirschmüller-Ohmes, G Sturm, and P Fürst

823S Substrate utilization during submaximal endurance exercise: the effect of β-adrenoceptor blockade and increased plasma nonesterified fatty acid concentration. MA van Baak, JM Mool, and JA Wijnan

824S Influence of dietary fish oil on muscle metabolism during endotoxemia. OE Rooyackers, M Faes, JW Wiertz, AJM Wagenmakers, and G Hornstra

825S Influence of dietary fat on substrate balance in humans. WPHG Verboeket-van de Venne, KR Westerterp, and F ten Hoor

826S Effects of diet on fecapentaene excretion. TMCM de Kok, D van Faassen, SRA Bausch-Goldbohm, F ten Hoor, and JCS Kleinjans

827S A moderate in vivo vitamin E supplement counteracts the fish-oil-induced increase in in vitro oxidation of human low-density lipoproteins. GS Oostenbrug, RP Mensink, and G Hornstra

828S Eicosanoid production by stimulated peritoneal mast cells. CMCJ van Haaster, W Engels, PJMR Lemmens, G Hornstra, and GJ van der Vusse

829S The essential fatty acid status of premature infants and the fatty acid composition of their diet. MMHP Foreman-van Drongelen, JM Westdorp, AC van Houwelingen, G Hornstra, THM Haasart, and CE Blanco

830S Effect of dietary fatty acids on arterial thrombosis in vivo in rats. G Hornstra, ADM Kester, and AAHM Hennissen
Calculus fluxes in activated blood platelets: effects of dietary fatty acids. JWM Heemskerk, MAH Fleige, and G Hornstra

Dietary lipids affect arterial thrombosis in rats by modulating the platelet-aggregation responses after a prothrombotic stimulus. G Hornstra and JW Wierts

This supplement is the responsibility of its editors, to whom the editor-in-chief of The American Journal of Clinical Nutrition has delegated supervision of both technical conformity to the published regulations of AJCN and general oversight of the scientific merit of each article.
